

Date - July 2nd, 2023 - July 7th, 2023

The burndown went up at some points due to changing and updating estimates, mostly at the beginning of the sprint but once in the middle. The last task we were not able to finish this sprint was event search.

We don't have an exact measure of the previous sprint velocity because we didn't estimate story points for sprint 1 at the time. The planned velocity ended up behind the actual velocity because of a later start and not finishing all tasks.
